Local News

Mr and Mrs Common and family moved to Edmonton on Monday leaving their son, Ernie there where he will attend high school.

Mr and Mrs Stirling and family arrived back from White Rock and Vancouver.

Mr and Mrs Jay left for California Monday.

Mr and Mrs Harry Watters and family from Big Valley are occupying the Flewelling residence.

Mr and Mrs Walker and Mr. Bough went on a fishing trip last week and report a big catch.

Mrs Albert Ray entertained the following ladies on Thursday afternoon: Mrs Wilton, Mrs Brown and Mrs Thompson of Alta, and Mrs J. H. Surum, Mrs Inner Surum, Mrs Gouglot and Mrs A. J. R-y. The 1 dies participated in a sewing bee after which a delicious lunch was served.

Miss Bailey and Miss Gouglot visited at the home of Mr and Mrs Durrant on Sunday.

Rev. and Mrs D. Whyte Smith of Big Valley visited with Mr and Mrs Bough on Monday.

Mr and Mrs T. Walton and Mr and Mrs Leo Ray enjoyed a fishing trip to Pine Lake on Saturday.

Miss Fluke of Big Valley is visiting at the home of Mr and Mrs A. H. McKenzie.

Mr and Mrs Carl McCormack visited their parents, Mr and Mrs W. C. McCormack on Monday. Carl reports that his Volvo garage business is prospering.

Pola Negri in "Hotel Imperial" at the Grand this Saturday.

Mr and Mrs Woolgar have taken rooms in Mrs Boyer's house.

Mrs Gaskill and Mrs Sam Griffith returned last week and from a trip to Banff.

Mr and Mrs Howard visited her parents, Mr and Mrs Hal Brewster.

Mrs Boyer has been on the sick list this week.

A very enjoyable time was had on Friday afternoon when Mrs Fraser and Mrs Macray gave a handkerchief shower at the home of the latter, in honor of Mrs King who is leaving for Calgary. Mrs Morgan gave an address of appreciation on behalf of the W. A. of which Mrs King was Secretary treasurer and who has been an ardent worker. Mrs Murray's baby Loraine was dressed as a cupie and carried in the presents.

The United Church Sunday School will be open on Sunday September 9th. On Tuesday September 11th the officers and teachers will hold their regular business meeting in the church 8 o'clock.

Mr and Mrs Cliff, Steele of Lacombe spent Sunday with Mrs Steele and son Mac.

Miss Phyllis Murray has accepted a position as waitress at the Imperial hotel.

Mrs McEvoy and Mr Brown motored to Edmonton last week and report the roads fairly good except at Millik.

Mrs Norman Spiece has her mother, Mrs Wilson Pyper and sister, Dot Pyper, of Vancouver visiting her till the end of September.

Fatal Accident

A fatal accident took place on Tuesday evening about 8.30 pm when Mr H. H. Wiggins who was proceeding home in his Fordcar in company with a galician harvester who had been working for him, turned over about six and a half miles out of town. Mr Wiggins had his hips broken and suffered severe injuries to his bladder and stomach, but the harvester's injuries were slight.

The presumption is that the car had gotten over the edge of the road which was built up in that spot, and as one tire was flat Mr Wiggins was unable to bring the car on the road, with the consequence that it turned completely over. The two laid there for two hours, when Clarence Sutley passed by in his car, and being unable to see the wreck was hailed by Mr Wiggins, who was then taken to his home by Dr McLenan, Dr Denorest of Bashaw, and Dr Hines of Lacombe being in attendance, but as the man was beyond all aid, his condition grew worse, the end coming at twenty-five to three on Sunday morning. Interment took place at the Mirror cemetery Rev. R. T. Harden officiating, and was attended by a large number of sympathizers. Mr Wiggins leaves to mourn his loss, a wife and eight children, five brothers and two sisters. A box was found to take off the crop.

On the evening of August 27 the members of Trinity Chapter O. E. S. Bashaw entertained the members of the Harmony Chapter O. E. S. Mirror other guests being friends from Stettler, Vancouver and points in Ontario and also from the U. S. A.

The evening was spent at Mr and Mrs P. G. Puffer's beach. Three huge bonfires helped a beautiful harvest moon to illuminate the beach. A delicious lunch was served by Trinity Chapter, wieners and corn being toasted in the bonfires, caused a great amount of merriment. A very pleasant time was spent. The guests leaving for home at a late hour, voted the members of Trinity Chapter, especially Mr and Mrs Puffer, jolly good fellows.

Order Your

Coal Early

Dear Sir or Madam:

Last winter the cold weather set in rather suddenly, and in some localities occasioned much hardship because local dealers with inadequate coal storage capacity were unable to cope with the sudden deluge of orders.

A similar condition of affairs may exist this winter and we strongly urge you to take at least a portion of your winter supply now. By ordering your supply now you are likely to get better coal than when the mines are pushed beyond their proper capacity, and you give us a chance to give you better service. In all probability it will be difficult for us to maintain supplies this winter due to our shortage, owing to the grain shipments. By ordering now we are able to buy at a better price, which we want to pass on to you. You will have to get coal anyway, so why not order your supply now and get it cheaper.

Crown Lumber Co.
Phone 14

On Friday afternoon at the home of Mrs Trotter, the many friends of Mrs Morrison entertained at afternoon tea, refreshments were served by members of the Ladies Aid and the Sunday School.

Mr R. J. Brown of McCook, Nebraska, arrived in town last week, the cousin and guest of Mrs McEvoy. Mr Brown motored a distance of about 2400 miles without a mishap and says that the roads might have been worse.

Mr and Mrs George Jackson went to Edmonton Wednesday on a business trip.

J. G. Russell leaves this Friday for a two weeks holiday at the coast for which length of time his office will be closed.

CARD OF THANKS

The relatives and families of Mr H. H. Wiggins wish to express their sincere thanks to all those who so willingly helped in the time of their recent bereavement. Also those who assisted with the crop of Mr Wiggins.

Mrs Whiting who has been taking treatment at Edmonton, is reported to be doing well.

Mr McTaggart of Stettler will be the speaker at the Board of Trade meeting this Friday, 6.30.

Proposal To Build Tunnel Under The English Channel Is Again Receiving Serious Consideration

Several times in the last half century the proposal to build a tunnel under the English Channel has been discussed, says the Toronto Mail and Empire. Now it is once more up for consideration. At one time it seemed that the project was about to get under way. Things had been taken on both shores and soundings and other data collected along the floor of the channel under which the tunnel would have been constructed. It was announced that an engineering difficulties stood in the way. Financial support for the tunnel had also been guaranteed. All that remained was to secure the permission of the British Government, the French being willing. That permission was refused, and later it was explained that military reasons decided the Government's course. It is presumed that this is the only obstacle to be removed if the project is now to get under way. At the time military fear was of an invasion. The objection was met by the engineer who planned the tunnel. They showed how the presence of an electric battery could flood the tube and driven away invading armies that happened to be in it. When the project was next mooted it was explained that the military reasons for refusing permission were based on the possibility that Great Britain might be invaded and captured and that the victorious enemy would demand possession of the tunnel as one of the spoils of war. This seemed far-fetched, for it seemed unlikely that if England were really under the iron heel of an invader she would worry much about what happened to the tunnel.

A few years ago Marshal Foch was reported to have said that if the tunnel had been in existence in 1914, the war might easily have been averted. Chastely if it had not been averted it would have been greatly shortened, and in the course of the struggle the tunnel would have paid for itself many times over. In the event of another European war with England involved as an ally of France, the possession of the tunnel would prove of incalculable value in transporting troops and supplies, and in avoiding the hazards of ferrying men across, hazards which are found to increase as the airplane multiplies and becomes more effective as a military weapon. But it is not because of the service in a future war that the tunnel is now being advocated, but as a means of swifter communication between the British Isles and the continent of Europe. Italy, Belgium and Switzerland are all as anxious as France to see the route approved and construction begun. They look into the future and see trains running every half hour between Paris and London, special through trains from Scotland and northern France, and perhaps later a tube in which motor traffic can pass from the sea floor from one country to another in half an hour. The channel passage is notoriously a bad one, and its perils have kept thousands of people from enjoying a visit to the Continent and stimulated equal numbers of Europeans from visiting the British Isles. The only interests that would seem to be adversely affected by a channel tunnel are the shipping interests, and this would apply only to the passenger service.

Canada Owns 30 Per Cent. Of Timber
The people of Canada, through their Federal and Provincial Governments, still own outright about 50 per cent. of the total standing timber; this, however, consists of the less valuable stands.

The man who tackles a business for which he is not fitted is apt to get it more troublesome and vexatious than profitable.

"They say the good Janus has two faces."
It must be a terrible job to wash every day." Montague, Charler.

Women and the Senate Will Make Application For Leave To Appeal From Recent Decision Of Supreme Court

Women of Alberta will make application to the Judicial Committee of the Privy Council for leave to appeal from the recent decision of the Supreme Court of Canada, to the effect that a woman is not a "person" within the meaning of the British North America Act and not eligible for appointment to the Senate of Canada.

Magistrate Emily Murphy, who is one of the Alberta appellants in the case, has announced that counsel had been authorized to make this application for leave to appeal.

Referring to recent despatches from Ottawa to the effect that provision would be made at the next session of Parliament for the amendment of the British North America Act so that women might sit in the Senate, Magistrate Murphy expressed her "heartiest appreciation of the Government's desire to right this wrong."

The government had informed the appellants they would not oppose the application to the Privy Council which was not meant to interfere with the "means devised by the Canadian Government but is taken in order to obtain definitely an interpretation of the word 'person' in Section 24 of the Act."

Alberta's Road Programme

Extensive Works Are Being Pushed Forward To Completion

From Lesser Slave Lake in the north to Medicine Hat in the south, from Vermilion to Jasper and Kamloops in the west, Alberta's road building programme for 1928, is being pushed forward to completion before the season closes, states Hon. O. McEwen, minister of public works in a statement just issued.

On the Peace River highway, clearing and grading contracts show substantial progress. Bridge crews are active between Smith and Rawlridge, and double shift is being worked on the drag line and other mechanical equipment.

On the Edmonton-Lloydminster highway, 75 miles of standard earth construction is going forward. Between Fort Saskatchewan and south of Chaplain between Mundare and Vegreville, and from Innisfree to Vermilion.

First course gravel placement is proceeding on the Edmonton-South Cooking Lake section of the work being 40 per cent completed. "The total cost will be \$70,000. Sixty-three miles of gravel is being spent on the Camrose-Vegreville section, of 25 miles. Construction which has been slow, is now speeding up, and the contractors force is being increased in number to this end. Fair progress is reported on the grubbing of seven miles of the Drummeller-Munson Road.

On the Calgary-Edmonton main highway additional courses of gravel are being laid on 90 miles of road, of which 75 miles are at present under contract, and asphaltic oil surface treatment of the gravel has commenced on the Calgary-Alberta section.

Standard earth grade on the Lettbridge-Mackled highway, to cost \$55,000, is rapidly approaching completion and good progress is being made on the Mackled-Pincher section of 20 miles, where, including several bridges to reduce grade, and eliminate railway crossings, some \$51,000 is being spent.

The graveling work on the 20-mile section between Mackled and Cardston is 25 per cent completed and work is well ahead on the 18 miles of road on the Lettbridge-Silverton highway.

On the Jasper highway, a substantial grading force is at present working at the western limit of the highway, and are approaching the east boundary of the park. Bridge crews are also at work on steel and timber spans. About \$28,000 is being spent on this section.

Re-surfacing and improving of the Calgary-Buff highway, the graveling appropriation for which is \$60,000, is well within the time limit despite traffic interference.

Death of Missionary Is Feared

A dispatch to The London Daily Mail from Hankow, China, says that it is feared there is a danger of the death of the Catholic missionary at Sin Yang Chou, in Southeast Hunan province, died after tortures by brigands who held him a fortnight ago. Monaghan Presby, who was an Austrian, was 61 years old.

Paper Mill For Winnipeg

Plans are being made for the erection of the Hilde and Dauch Paper Company's million dollar plant, which they will erect in Winnipeg, according to advice received by J. M. Davidson, secretary of the Manitoba Industrial Development Board, and reported at a meeting of the new industries committee recently.

"Isaac, can you float alone?" asked one friend of another whilst talking.

"Don't talk business now, call at my office tomorrow," was the reply.

"There is no service in the church today!"

"That doesn't matter, I only came in to get warm."—Moustique, Charleroi.

W. N. O. 1748

Scarcity Of Timber

Canada Must Depend Largely On

Canada For Forest Products
Australia must be content to receive a heavy import of timber from Canada and other countries, according to V. R. Leigh, Australian forestry expert, who recently made a vigorous appeal for reforestation for the Commonwealth.

"Timber cannot be self-sufficient in timber unless 24 per cent of its area can grow timber," said Mr. Leigh. "Australia can supply forests on only 1.29 per cent, of its land, so you see the situation is quite hopeless."

Mr. Leigh cited in comparison countries such as Sweden with 52 per cent of its land suitable for forest; Austria, 38 per cent; United States, 24 per cent.

"The word of the situation is that the world is eating up timber faster than it is replenishing its stock," he said. "Thirty-seven million acres of timber were consumed last year and only eighteen million acres were replaced. Canada is the only country in the British Empire in a position to supply timber, but she is using her supplies three times as fast as she grows them. The United States absorbs ten times more timber resources eight times faster than she renews them. Ten years ago there were 2,000 recognized uses for forest products. Now there are 4,500."

Compulsory Egg Grading

Opposition To Egg Grading The Result Of Misunderstanding

The opposition of farmers to compulsory egg grading almost invariably arises when the results of grading on the industry are properly understood. At a recent farmers' meeting in the British Empire in a position to supply timber, but she is using her supplies three times as fast as she grows them. The United States absorbs ten times more timber resources eight times faster than she renews them. Ten years ago there were 2,000 recognized uses for forest products. Now there are 4,500."

Has Radio On Train
In the royal train, Queen Mary has been redecorated, Queen Mary has had a radio set installed so that she can enjoy London music to while away the tedium of the trip from Buckingham Palace to Balmoral Castle, in Scotland.

"John, do you want all those old books in the attic?"

"As, throw them out—I don't expect to read 'em."

"Then you may carry them down to the storeroom."

"As, throw them out—I don't expect to read 'em."

Canada's Mackenzie river, with its tributaries, 5,000 miles long, is equal to two-thirds of the distance across Canada.

Pins have been used for four hundred and forty years; needles for forty centuries.

The Cost Of War

Almost Half Of Revenue Of Country Goes To Pay War Expenses

Prime Minister King's statement in one of his Saskatchewan speeches that of every dollar raised by the Dominion Government 45¢ goes in going to pay war expenses is something about by Canadian people.

Canada has not had many wars; we have been a peaceable people and up to the time of the Great War our expenditures for wars, pensions etc., must have been small. "The nation had been looking after the survivors of the North West Rebellion forces of the force sent by Canada to South Africa, but outside of this the drain on the treasury could not have been heavy. Our military had naval forces have always been kept at a minimum so that our national outlay in this respect must have been small in comparison with the European nations."

It is estimated that the Great War cost Canada well over a billion dollars. Today we are paying this back and at the same time the people have on their hands the pensions that will have to be carried for at least fifty years.

While no one will grudge what Canada spent in the War and what is required to provide pensions and care for those who went to the aid of battle, the point must remain that fighting is an expensive business. It is possible that it is man's belligerent nature that keeps him from climbing the heights of Utopia.

It is evident that if the League of Nations can do anything to reduce the number of wars it is the best financial investment into which any nation can put its money.—Free Press

Japan Takes To Automobiles

Flowery Kingdom Responsible For Heavy Shipments From Canada

Modernistic trends in the flowery kingdom of Japan may be responsible for the unusually heavy shipments of automobiles and accessories to the Orient this year, according to J. A. Langley, Canadian trade commissioner in Tokyo, who, with his wife and family, sailed from Victoria aboard the Canadian Pacific liner Empress of Asia, after ten months' leave in Ottawa, his home city.

"Probably the coronation ceremonies will be held November 27," said Mr. Langley. "While it is some months since I have been in Japan, I presume that the coronation procession from Tokyo and Kyoto, the old capital, is to be largely motorized." Ours teams and other almost prehistoric modes of travel, Mr. Langley explained, have characterized previous functions when the Mikados have journeyed to the ancient capital city followed by thousands of their loyal subjects, to receive their emblems of sovereignty.

Selling New York From The Air

Visitors to New York hereafter will be enabled to "see New York" from the air. An aerial sightseeing service has been inaugurated by flight around the Statue of Liberty. The company will use metal cabin airplanes, which will carry five passengers in an open cockpit.

Many automobile roads are being constructed in Sicily.

Life Not Made For Ease

The Successful Man Must Be Prepared To Accept Hardships

Life to be lived successfully must be lived dangerously. This recent remark by the distinguished Irish politician, Sir Arthur Keith, carries the warning that only persons of experience will recognize.

As we start out in life, safety seems the ideal. If we could only attain it we feel we would be happy. But as time passes we see there is no such thing as safety. We marry. What a hazard is involved! But the chance of a successful outcome is far more than all the risk.

Children come. Sickness may overtake them. They may go wrong. But again the risk is worth while. We strive for a job where we may not make good. But if we took no chance we would get nowhere. As we go on we discover that the apparently satisfied and successful business man has a very different attitude. "They are constantly riding disaster for the sake of an uncertain gain."

No life was made for ease. If we made for adventure, and only those willing to make the adventure can hope for the great rewards of industry and friends and achievement.

The successful life must be lived dangerously!—Kansas City Star

To Study The Caribou

Party Of Americans On Way To North Country Under Auspices Of American Museum

Count Hla Tolstoy, grandson of the late Count Leo Tolstoy, Captain Horace Ashton, Richmond, Virginia, Geographical Society, photographer, and William Cassell, New York, passed through The Pas recently on their way to the northern wilds to study and picture the Canadian caribou.

The party left Sturgeon Landing and will later leave for Lac du Bonnet and five hundred miles further on to the fields where the caribou are at present ranging.

The expedition is under the auspices of the American Museum of Natural History. Major Ashton has recently completed an air survey of the Andes in South America, and found several lake villages which had not been previously known to exist.

The expedition will guide by the advice of Del Simon, trader of Du Brochet and will be guided by William James, old time scout of The Pas.

Lighthouses On Great Lakes

Conditions are excellent. A. Johnston, deputy minister of marine, declared, upon his return from an inspection of lighthouses and life-saving stations on the Great Lakes in company with Hon. P. J. Gardin. The party left ten days ago in the Canadian Government ship, Lady Grey, and examined all government stations as far up the lakes as Sault Ste. Marie.

Wife of well-known man: "You loved me more when we were only engaged."

Well-known man: "Well, to tell the truth, my dear, I never cared for married women."

While the population of England and Wales has more than doubled since 1835, the general death rate has been reduced one-half.

Taking Care Of British Miners

Should Develop Some System In Order To Retain Good Settlers

Miners of the unemployed miners in Great Britain are only one generation away from the idleness. If a property thought out scheme of land settlement could be presented to them, Canada would receive many of them as permanent settlers. But a dilemma of any lasting good coming from the recently inaugurated laborers' excursions. In this manner, A. A. Heaps, Labor member of parliament for Winnipeg, expressed his opinion of the present influx of miners. Mr. Heaps was in Montreal en route home from England, where he studied the British Commonwealth Labor conference recently.

"There is growing anxiety on the part of all classes among the unemployed employment problem," Mr. Heaps added. "Take the case of these miners. The majority of them are financially destitute. They and their families have nothing to look forward to if some system of permanent settling them in our vacant spaces could be devised the whole enterprise would benefit. But there would have to be adequate financial assistance."

"It seems a long journey to ask a man to make—coming from Cardiff to Calgary for two months' work," the member for Winnipeg continued. "There is no possibility of their being absorbed into our industries when the threat of the crop in British overseas conditions we haven't worked enough to keep our own citizens all through the winter."

The Age Of Miracles

The World Moving Some Faster Than It Has For Years Ago

In the thirty years ago column of the Toronto Globe, of August 10, it is announced that "telegraph communication will be established between Winnipeg and Thunder Bay in six weeks' time." If the writer had added that fifty years hence the people in Winnipeg and Thunder Bay would be talking to each other by telephone, using wires, that a speech delivered in Winnipeg would be heard in Thunder Bay by radio, without the aid of wires; that horseless carriages would convey people between Winnipeg and Port Arthur at speeds of over thirty to seventy miles an hour on paved highways, and that the distance between the places would be crossed by airplanes, travelling at hundred miles an hour—he would have lost his job.—Port Arthur News-Chronicle.

Millionaires In Canada

Returns Show That Individual Wealth Is Not Centred In Western Provinces

A recent report states that there are 272 millionaires in Canada. Of these 191 reside in the province of Quebec, 76 of whom are in the city of Montreal, the largest city in Canada. The province of Ontario has 47 millionaires, 13 of whom are in the city of Toronto. British Columbia nine; New Brunswick, five; Alberta, four; and Saskatchewan, four. Neither Saskatchewan nor Prince Edward Island has a millionaire, but a fair percentage of the population of these two provinces are of comfortable wealth. In Saskatchewan, Alberta, and Manitoba between 70 and 80 per cent of the farming population own their own homes.

Road Warnings In Wales

American Craze For Witty Signs Has Reached Old Country

The American craze for witty road warnings and danger signals has reached England. The country signs for some distance around Cardiff is plastered with such signs as the following:

"A car on the road is worth ten in the ditch."

"Fatal accident here."

"Better be slow than sorry."

"Be wise in time (Psalm vi.)."

"Remember the firework must be paid for."

"Life is short; Don't make it shorter by scorching when you don't ought."

Waterloo Lakes Famous For Trout

Excellent fishing may be enjoyed in the national parks of Canada, especially in the Waterloo Lakes near Park, Alberta, which is famous for its trout. Specimens of trout weighing as much as fifty pounds have been taken from the waters of Waterloo Lakes National Park.

"You don't seem to take any interest in anything I do now, George."

"How can you say such a thing? Why, I lay awake all night wondering what on earth you put in the pudding you made yesterday!"—T. B. Ritz.

"The chronic kicker is always disliked, but one gets more attention than the meek man."

Air Mail Service

Government Of Canada Making Plans To Keep Ahead Of The Times

The postal airway across the United States, from New York to San Francisco and Los Angeles, is inspiring Canada to establish an air mail service too. There are always connecting with the United States transcontinental line, extending far to the north, to Florida and Texas. Northern lines also reach out to the border states, as far as Boston and as far west as Seattle. The process of linking up with Canada is just beginning. On the Pacific Coast, a daily service has been proposed to include Victoria and Vancouver. Eastern Canada's first attempt, 14 being made from Montreal and Albany. It is expected that another air line will soon link Toronto with New York, through Schenectady.

The Minister of the Interior-General has stated that it is the intention of the Dominion to open the eastern air mail service this fall, to include Hamilton and Windsor, and to connect with Detroit and probably Duluth. A winter service may be established to expedite the movement of overseas mail. Service to Montreal, St. Lawrence and Toronto, Mail delivered to mining camps and other remote places have also been established.

Next spring, the Post Office probably will commence an air mail service in the prairie provinces, covering the country between Winnipeg, Calgary and Vancouver. It may take longer to bridge the sparsely populated territory between the east and the head of the Great Lakes, across the Rocky Mountains to Vancouver. Preliminary surveys are under way, however, in locate suitable routes. This year, the air mail service of Lake Superior, and through the mountain passes from Alberta to British Columbia, Canada intends to keep abreast of the times in air mail service. It is surely a magnificent escape, as Christian Science Monitor.

Has Healthy Appetite

Russian Railroad Worker Needed Higher Wages To Pay His Greedy Bell

Iron Krasnovodsk, which is Russian for Ivan the Red Eyed, ate so much that government officials were forced to double his salary.

Iron is more than seven feet tall and correspondingly stout. He works on the Turkistan-Siberian railroad near the Rocky Mountains in Russia.

Ivan complained that he was afflicted with an enormous appetite, eating food upon which other laborers lived with very good results. His salary was insufficient to meet his greedy bill.

The local economic commission, which fixes wage scales, decided that the work the red-eyed one did in short space with other laborers was cheap at half the price and ordered his pay doubled.

Strange Case Of Fire

The rays of the sun reflected by the mirror of a dresser after they had passed through a window are held responsible for a fire which broke out in the store of Dr. R. Beddell Company, Ltd., general merchandise of Andover, N.S. The store was destroyed with only a safe recovered.

Of the quarter of a million Americans who visit France every year, French statisticians estimate two per cent are millionaires. Americans spend \$220,000,000 a year in France.

Youth Develops Air Mindedness

Though the D. H. Moth is one of the smallest aeroplanes made, it almost qualifies for the role of "Dignity" when compared with the small motor aeroplane in the hands of Jack Longhairs, American model aeroplane pilot. The Moth was a trip to Europe from the "American Boy" Magazine, on the Canadian Pacific line "Montclair." While in England the boy took part in competitions with British model aeroplane builders, and one of them, Port Grant, Michigan State champion, won a prize offered by E. W. Beatty, president of the Canadian Pacific, at a contest which took place at the famous Croydon Aerodrome, where the picture was taken.

British Immigration

Conference Between Lord Lovat and
Ottawa Authorities Brings
Results

When the immigration conference between Lord Lovat, head of the Empire Settlement Board, and federal immigration leaders concluded at Ottawa, an official statement was issued, saying "It is confidently expected that the result of these negotiations will be a steady and regular flow of suitable British migrants to Canada."

The conference discussed various matters arising out of British immigration to and settlement in the Dominion, with particular reference to the measures to be adopted both in Canada and in Great Britain, to give effect to the recommendations of the select standing committee of the House of Commons on agriculture and colonization. All these recommendations and other proposals made by Lord Lovat have been fully and frankly discussed, and the mutual appreciation of the difficulties on both sides and in every case a satisfactory understanding had been arrived at, the statement said.

Heavy Apple Crop

Increase Of Almost 600,000 Boxes Of
Apples From Okanagan District
Is Indicated

An increase of almost 600,000 boxes in the shipment of apples from the Okanagan fruit district is indicated in a report issued today by T. P. White, superintendent of car service, Canadian National Railway, Winnipeg. The latest estimates indicate that the "McIntosh" crop will amount to 1,252,460 boxes as compared with 733,493 boxes last year, or an increase of 519,967 boxes or 69 per cent. The total apple crop, which comprises largely the "McIntosh" and the "Wealthy" brands, is expected to amount to 3,228,335 boxes this season, which is an increase of 303,445 boxes over last year.

BABY GIRL HAD DIARRHEA
WHEN CUTTING TEETH

Mrs. A. J. Murray, golf Lake, Sask., writes: "Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhea. I didn't know just what to do for her as the child's teeth were coming in. Just one of my neighbors said to me, 'Haven't you any DeFowles'?"

why I wouldn't be without it where there are children."

"My husband went to town and got a box of DeFowles' and in three days she was well, and the very first day she was running around as well as ever."

Reindeer For Hudson's Bay Area

12,000 Reindeer From Alaska To Be
Sent Overland

Shortly after the twelfth season is over, 12,000 reindeer will be herded from Alaska to the shores of Hudson's Bay, according to N. A. Braden, of the Dominion Reindeer Company. This is due to the rapid increase of the herd of 12,420 animals started in Alaska thirty years ago. It is expected that the herd will be selling about ten miles per day, but first, the shortest route must be found and charted.

WAS VERY DELICATE

New Health Came Through
Using Dr. Williams' Pink Pills

Mrs. Casper Miller, Lourdes, N.B., says that twice in her lifetime she has reason to be thankful for what Dr. Williams' Pink Pills did for her. She says: "I was a very delicate girl going into womanhood, when I began to benefit from Dr. Williams' Pink Pills. I was a sufferer with cramps and nervousness, and was hardly able to move around at all. One day when I was very sick a friend came in to see me, and she said to my mother, 'Why not try Dr. Williams' Pink Pills?' I felt an altogether different girl and no longer was I a nervous wreck."

Then a few years ago I was attacked with influenza, and was sick six weeks. Again I started taking Dr. Williams' Pink Pills, and I am the mother of a family and do all my own work, so you see I have to keep my health in good shape. I use these pills to keep me so. Now to all my friends who are suffering from any condition due to poor, watery blood, or nervousness, I am taking Dr. Williams' Pink Pills now, and note how I feel stronger, and how my health improves. You can get these pills through any dealer in medicine, or at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Reforms In China

Women Must Beh Half and Remove
Bridle From Face

The municipal bureau of public safety has decreed that Peking women under 30 years of age must look their hair or pay a "degeneracy tax." The order became effective Sept. 1. It is meant to discourage the old Chinese style of hair dressing and contradicts the ruling of General Chu Yu-Pa, military governor of Chihai under the former regime, who reported that his hooligan henchmen would punish even his own consorts for disobeying this order.

The mayor, Ho Chi-Kang, is determined to eliminate feudalistic habits still adhered to by some of the Peking people. He has ordered that men who insist upon wearing queue must pay a heavy monthly tax and women must remove the bindings from their feet within the next few days or pay a periodical fine.

Choked For Air. Some little irritation becomes lodged in the bronchial tubes, others gather in the throat, choking of asthma results. Nothing clears the system so quickly as relief as Dr. D. K. Kellogg's Asthma Remedy. The healing, soothing smoke of vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

Supplies For Northern Posts

Schooner Sails From Vancouver On
Mission For R.C.M.P.

The new auxiliary schooner St. Roch, of the R.C.M.P., has set sail from Vancouver to carry fresh provisions and supplies to the posts in the R.C.M.P. It is manned by a crew of 13 officers and men headed by Captain W. H. Gillen, Vancouver, and P. Kelly, chief engineer. The course set for the schooner is through Bering Straits and around the northern coast of Alaska to Herschel, Yukon territory. By radio the Boating detachment will keep in touch with headquarters at all times. Members of the R.C.M.P. comprising the crew include Constable T. A. Parson, J. Olsen, Larsen, Todd, Foster, Sealey, Plarry and Lamoth.

Many infants are infected by worms which cause great suffering, and if not promptly treated, may lead to constitutional weakness difficult to remedy. Miller's Worm Powders will clear the stomach, and by killing the worms and will so act upon the system that the child will be free of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

For the first time a film has been shown in an aeroplane. It took place in a machine travelling from Paris to London.

Planting Trees On Highway

One Of The Most Beautiful Driveways
In Western Canada Planned By
Mr. Pat Burns

The main north highway from the Calgary city limits south to Midnapore, some ten miles, will be transformed into one of the most beautiful drives in Western Canada within the next two years as a result of the decision made by Patrick Burns, well known pioneer cattleman and rancher to plant trees on his land, which skirts both sides of the highway clear through to Midnapore.

Work of preparing the land for the tree planting is already under way, and the first trees will be planted next spring. The section between Calgary and Midnapore will be completed next summer, and it is possible that Mr. Burns will extend his activities further south the following year, as he owns a considerable amount of land south of Midnapore.

Russian pupils will be used with maps scattered here and there.

Protect the child from the ravages of worms by using Miller's Worm Powders. It is a standard remedy, and years of use have convinced its reputation.

Year's Shipment Of Wheat

In the 1922-23 crop year, ended July 31, last, a total of 261,000,000 bushels of wheat was handled through the elevators at the head of the Great Lakes, situated at Port Arthur and Fort William, Ontario, on Lake Superior.

Where Co-operation Is Needed

The movement of ten thousand unemployed British miners to Canada to work as harvest hands in the grain fields of the West is no significant fact may have such far-reaching results, that it warrants additional consideration to that already given in a previous article in this column.

Suppose the situation was reversed and there was a surplus of tens of thousands of farmers' sons and farm hands in Western Canada who could not find employment, while, on the other hand, there was a shortage of miners in the coal-mining districts of the British Isles, and the experiment was tried of transporting an army of men from the grain fields of the West to the mines of Britain.

Under such circumstances the sympathy of the people of Canada would go out to their sons as they journeyed to an unfamiliar country to engage in work of which they had no knowledge or training, and to live under conditions entirely new to them. There would be hope in the hearts of the relatives and friends of those men that the British people and the nine brasses would be considerate in their treatment, lenient in their judgments, sympathetic and patient in dealing the strangers to adjust themselves to their own environment and make good.

Fortunately for Canada its sons do not have to go abroad in order to find work and opportunity, because nowhere in the world today is work more plentiful, where greater opportunities present themselves than in Canada. This very fact should, however, but provide a greater incentive to our people to extend a heartening welcome and a helping hand to these British miners.

Judging by numerous statements made by these men, the vast majority of them have come to Canada with the right spirit, a real determination to "make good" and achieve not merely a temporary but a permanent success in this country. They come wholly unprepared in the work they are to undertake. Instead of working eight hours a day, they will be required to work from early dawn till dark, but the spirit of the men was expressed by one of them on the eve of sailing when he said that eighteen hours at work in the open fields and fresh air of the prairies would not be any worse than eight hours under ground in a coal mine.

Enroute over the ocean, the first group of miners wireless telegraph to the British Government that they were determined to succeed and to make their landing in Canada, and again at Winnipeg, Regina, Moose Jaw, and other points of distribution, man after man expressed the same view, namely, that they were anxious to make a success in Canada and were hopeful of securing work after the harvest and becoming permanent citizens of the Dominion.

These men by the act of their coming to Canada as harvest hands have shown that they prefer work, even hard unaccustomed toil, to living in idleness on the "dole" in Britain. Each and every one of them had to pass a rigorous physical examination before being allowed to sail. They are, therefore, the pick of the unemployed miners, and, animated by a desire to "make good" they should succeed if given a fair chance, and a helping hand and encouragement.

That chance, assistance and encouragement should be forthcoming in large measure from the Canadian people as a whole and, in particular, from the individual farmers who employ them. It will be necessary to show these men how their work should be done and how to do it. This will require tact and patience. Too much must not be expected of them. And the man who makes an honest effort to learn, who shows a real determination to work and render service to his employer, is deserving of every encouragement.

Such encouragement cannot be better shown than by a kindly, sympathetic attitude a personal interest in the man's welfare, and in all cases where it is possible to do so, by the offer of a job for the winter. The knowledge that, if he shows a disposition to make good, he will be provided with work for the winter, and thus given the opportunity to become a permanent settler in Canada, will provide the greatest possible incentive to a man who is desirous of achieving that result. And it is settlers of this British type of which Canada stands in need.

If all parties to this unique experiment strive to make it a success there is no reason why it should not succeed, and if it does prove successful, its success being judged by the results of the movement as a whole rather than by individual cases—then it will, in all probability, prove the beginning of a new and successful immigration from the unemployed groups of British unemployed in the British Isles to the open spaces of Canada, where, through their labor, such people will be an important factor in bringing large tracts of vacant land under cultivation, and in providing the necessary man-power to develop Canada to its fullest potentialities and resources of the Dominion, thus making comfortable homes for themselves and adding immeasurably to the productive capacity, wealth and prosperity of Canada, and incidentally of the Empire as a whole.

No Menace To Consumer

British Delegate Returns Home Favorably Impressed With Wheat Pool

"We do not agree with those who see in the pools the menace of a monopoly to the disadvantage of the consumer," writes Henry May, general secretary of the International Co-operative Alliance, who was one of the principal speakers at the recent international wheat pool conference.

Mr. May expresses his views in the Co-operative News, published in Manchester, England.

He states that the economy of production on large scale methods, the elimination of the middleman's gross

Canadian Handicrafts Guild

Encouraging the Settlers to Continue Crafts Of Their Homeland

Twenty-one years ago the Canadian Handicrafts Guild was organized with the object of preserving the varied crafts native to this country, or brought here by settlers from European lands. The hope behind the movement was that these crafts might be stimulated to take root in Canada and to develop along distinctive Canadian lines.

The guild's exhibition room at Montreal is a veritable wonderland of beautiful and useful articles, designed by the brains and shaped by the hands of Quebec habitants, Scotch-descended natives of the Maritimes, Central Europeans settled in the Prairie Provinces, Swedish Indians of British Columbia and other races which for untold centuries have boasted peculiar skill in one or other creative craft.

Upon the shelves are squares of "catalogue," the French-Canadian carpet weave in the production of which the habitants were so expert. Beside them piled rolls of homespun for dresses and men's suits. On little tables rest intriguing examples of Indian handicrafts, baskets woven from scented hay and finely glazed bits of pottery from the ovens of St. Andrew's N.E. and of British Columbia.

One of the most striking exhibits in this striking collection is a consignment of diminutive items just received from an aged Swedish Indian living far north on the Pacific coast. Any eyes which follow the eddy beautiful for all once he caught by these word replicas of the Red-man's most ambitious adventure in creative design. The fervently powerful heads of animals and birds surrounding symbolic combinations of line are given by this ancient craftsman in black slate. It would be hard to imagine more decorative material earned out.

The tattered pole motif is happily carried on by other craftsmen in wood and pottery. The totem carved from wood are brilliantly pigmented.

As the work of the guild is entirely voluntary, all the proceeds from the sale of these objects goes to the

craftsmen. Each year approximately \$70,000 is distributed in this way. The handicrafts are further brought before the general public by an exhibition held each year in the Art Gallery at Montreal.

In forming the league its founders had originally in mind the happiness of the immigrant from abroad, who is often because so discontented after a brief sojourn among strange scenes and people. By encouraging him and his family to continue the crafts of their homeland, particularly through the long winters when farmwork was at a standstill, they planned to provide him with an occupation for his mind and hands and a source of extra income at the same time.

Modernization Of Turkey

Mustapha Kemal Says Latin Alphabet Will Be Introduced In Country

President Mustapha Kemal, recently appeared at a people's party here in Constantinople and unexpectedly made his first speech in many months.

"Within two years," he said, "the Latin alphabet will be universally used in Turkey, and so shall prove that our intelligence is equal to the civilized world after banishing the incomprehensible Arab characters which are responsible for 80 per cent. of illiterate Turks. It is no longer a time for speeches, it is a time for action and we shall institute this important reform, which is not our last."

The president then wrote out his speech on a menu using a Latin alphabet and had a friend read it aloud to prove his facility with the new alphabet.

Silly Connected With Exhibition

Percy W. Abbott, K.C., president of the Edmonton Exhibition Association, will continue as part-time manager of that organization. Supporting a recommendation by the executive, the exhibition directors at a meeting held in camera decided on the re-engagement of Mr. Abbott on a part-time basis, his salary to be \$300 a month and his engagement to be terminable at the will of the directors.

There is nothing wrong with the mind of a man who minds his own business.

Whittled Out Of Wood

Unique Set Of False Teeth Creates Much Interest

Dental laboratory technicians, accustomed to working with fine gold and porcelain, gazed with awe in Chicago on what they regarded as the most extraordinary set of false teeth in existence.

The unique denture, exhibited by Dr. C. E. Clements, instructor at the University of Tennessee, at the National Dental Laboratory Technicians' convention, was whittled out of wood by a Tennessee mountaineer and used by him for many years.

The upper set is made of oak, the lower of basswood. Both plates apparently fitted the mouth cavities to perfection for the original owner, Dr. Clements said, had no difficulty manipulating corn on the cob. The teeth, carved from the same block of wood as the plates, were had imitations of the natural dentures.

The set was discovered by Joseph Thomas, a dental technician in Knoxville, Tenn., who gave in exchange for it a modern denture.

The Sailor's Uniform

Evolution Of Costume Worn By Jack Tars Has Been Gradual

The evolution of the sailor's uniform has been gradual. The sailor, indeed, originally went to sea dressed as he pleased, and though later he was made to wear some sort of uniform, it varied in ship to ship with the individual taste of each captain. It was not until the late years that the whole Navy got its uniform. Since its introduction, the uniform has altered very little. The uniform sailor needed to roll his trousers up to do his work, and the Navy man today still wears baggy trousers. The sailor's collar, his hair in a pigtail, so he had to have a collar to protect his dress from the grease with which it was made up. So came out "sailor's collar." The three stripes on this collar are popularly said to commemorate the three great victories of Admiral Nelson (the Nile, Copenhagen, Trafalgar), but the weight of evidence is rather that the stripes were added merely to make a uniform roll for the collar.

Wants Canadian Backing

Capt. Courtney Asks To Make Another Trans-Atlantic Flight

Canadian backing is being sought by Captain Frank T. Courtney, for another trans-Atlantic flight in the metal flying-bird, which arrived at Montreal recently, aboard the Italian freighter Valparaiso, after floating five days in mid-Atlantic. Owners of the Valparaiso returned the White fleet of salvage charges to Courtney as a condition of his flight. He is registered in Canada and his flight Courtney thinks should make Canadian anxious to assist another flight.

Edward Hanson, his backer and passenger, has already spent \$75,000 and is disinclined to spend more. Courtney estimates at least \$120,000 damage to the plane which has been removed to Canada Vickers yards for repairs.

Increase Gasoline Tax

Ontario Would Raise Tax On Gas And Lower License Fees

The intentions of the Ontario government to increase the gasoline tax this year and reduce the license fees on motor vehicles was announced recently by Premier Ferguson. This readjustment has been under consideration for some time.

"We want to get as near as possible to an equitable basis, so that people will pay in accordance with the use they make of the machine and the damage they do," said the premier.

The term "furlong" is a shortened form of "furlong-length." The average length of a furlong cut by a plow across a field was about 200 yards. From a rough indication of distance it gradually became fixed at 220 yards.

Blasted out of solid rock, a new "strong room" covering an area of two acres has been built on an old constructed 100 feet below the Bank of France. The task occupied 1,200 men for three years, working night and day.

During the business times this summer, as many as 50 school buses, Chinese and specials will be arriving at or leaving the London air station daily.

Canada has 160 species of hardwoods, and 31 of softwoods—a total of 191.

Minard's Liniment cures cuts, etc.

A Friendly Gesture

Germany's Endowed Friendship For England Revivified In New Book

Germany's renowned friendship for England is reflected in a small volume, just published, "London: Love of a City," by Wolf Zuckerk, a young German publicist. The new book compares favorably with many bulky tomes, in which German travelers endeavor to enlighten their countrymen on matters beyond the channel.

This latest contribution to German post-war literature on England shows the extent to which the "hymn-of-date" psychology has been unlearned; for Zuckerk's volume is not merely a chronicle of objective impressions of London and England; it is the diary of a personal experience of an impassioned lover of London and England.

Unlike many of his European contemporaries, Zuckerk records his impressions of England and London without any attempt to analyze them by Continental standards. Few foreigners have ever presented a more enthusiastic account of the English capital.

Tributes To Canada

Party Of British Chemists Are Favorably Impressed With Conditions Here

Tributes to Canada marked a dinner at Montreal tendered to the party of British chemists en route to the United States where the annual convention of the British Institute of Chemical Engineers will be held this year. Nearly 200 were present.

Sir Alexander Gibb, president of the British Institute of Chemical Engineers, declared that "our visits here, arrived on Saturday at Quebec have impressed upon us perhaps more greatly than we knew the extraordinary way in which Canada is going forward. It makes one realize that Canada is cutting out a course for herself, an independent course, and a course that breaks well for the future not only of Canada but of the British Empire."

Tablets Aspirin
Bayer

MOST people know this absolute antidote of pain, but are you careful to say Bayer when you buy it? And you always give a place to Bayer on the box—and the word "Bayer" printed in red? It isn't the Aspirin without it! A more serious disease has Bayer, with the proven directions listed in every box.

Aspirin tablets are the most reliable remedy for all kinds of pain, whether it be headache, toothache, neuralgia, rheumatism, or any other kind of pain. It is the only medicine that is so safe and so effective. It is the only medicine that is so quick and so reliable. It is the only medicine that is so easy to take and so easy to get. It is the only medicine that is so well known and so well liked. It is the only medicine that is so cheap and so good. It is the only medicine that is so sure and so safe. It is the only medicine that is so good and so reliable. It is the only medicine that is so quick and so effective. It is the only medicine that is so easy to take and so easy to get. ASK FEDERAL AID FOR HIGHWAYS IN THE WEST

Edmonton.—Launching of a strong campaign for federal aid for highways was expressed at a meeting of the northern directors of the Alberta Motor Association, held here, when A. R. Mackay, provincial president, and Fred R. Brown, head of the Calgary branch, were also present. This was following up the request made at the annual convention held last spring when a resolution asking the federal authorities to grant \$50,000,000, which would be spread over a term of five years, was passed. The sum specified would be used for the Dominion and greatly adding to Canada's tourist attractions in that way.

The federal grant, however, is felt that this basic work out unfairly on the far-flung prairie especially, and that it should be apportioned on a mileage basis instead.

President A. R. Mackay is strongly in favor of a vigorous campaign to get the federal aid for highways. He said there should be no delay in showing the Dominion authorities that there is a feeling throughout the country in favor of such assistance for highway programmes.

Receives Appointment

Gen. George Given Position More in Keeping With His Station in Life

Quebec.—Although he was making expenses and was learning French through contact with other officers at the hotel where he was engaged in washing dishes, Brig-Gen. Charles Henry Gault has decided to accept the position of adjutant-general with his former expedition. Thanks to the publicity which he received when an officer of H.M.A.S. Australia, met him here and revealed to the local paper that the former soldier was doing mental work, General Gault has received an offer of an appointment with a company operating a steamship service on the St. Lawrence River in the Gulf.

May Remodel Liquor Act

British Columbia May Follow Lines Of Quebec System

Victoria, B.C.—"We are just sketching now," Hon. R. P. Pooley, attorney-general in the new Conservative cabinet states. "We cannot say much about things until we have finished that."

The attorney-general intimated, however, that there would be lots of action soon and agreed that the liquor act was one that would receive early attention. Critics of the act in touch with party leaders have suggested that the British Columbia act may be remodelled somewhat after the lines of the Quebec Act.

Would Adopt Drastic Measure

Toronto.—The Chief Constables' Association of Canada, in session here, appointed a committee to urge Ottawa to fingerprint all immigrants.

Lengthen the residence period required for naturalization from three to ten years, make criminal misdeeds grounds for deportation of even naturalized citizens, and widen the Habitual Act to fingerprint even vagrants.

Search Proves Fruitless

Rome.—Extensive searches among the islands off Northeast Land and in Queen Victoria Sea almost as far as Franz Josef Land by the Italian expedition, have failed to find the missing Amundsen and Italia groups thus far have been unsuccessful, the base ship, Clitta Di Vittoria, King's Bay report.

The co-breaker Braggan has also been taking part in the search.

Charged With Violating Sales Tax Act

Toronto.—Police acting under orders of the federal government arrested eight men and two women here on charges of violating the Dominion Sales Tax Act. The accused are all officials and employees of manufacturing firms. Bill in each case was fixed at \$5,000.

Floods In Britain

London.—Abnormal floods are creating much damage to property and roads in Cumberland and Westmoreland and while floods in Cheshire have wrought much damage to crops, harvesting at many points is at a standstill.

W. N. U. 1718

British Warship Not Welcome

Soviet Government Will Not Permit Warship To Transfer Bodies Of Submarine Crew

Moscow, U.S.S.R.—The Soviet news agency Tass says that in response to a British request through the Norwegian mission to Moscow, that Great Britain be allowed to send a warship to transfer the bodies of the crew of the recently sunk Russian submarine from Leningrad to England, the Soviet Government has replied that it cannot consent to a British warship entering Soviet territorial waters.

The Soviet Government would not object to a warship of a friendly nation such as Norway or a British merchantman coming.

The L-53 was sunk in 1919 while assisting the white Russians against the Bolshevik Government but recently was raised by the Soviet authorities, who found a number of skeletons of British sailors.

University Women Meet

Membership Of Federation Now Stands At Twenty Two

Vancouver.—Women's place today, her participation in world affairs, and her limitations because she is a woman, were some of the topics discussed at the fourth triennial conference of the Canadian Federation of University Women by Mrs. Bertha Landis, craft secretary at Port Charles.

Mrs. Landis said that "the woman who deliberately turns her back upon marriage, upon a home and children, is doing the greatest mistake of her life, but forcing these things upon women only breeds unhappiness."

The membership report of the federation was read by Miss Marjorie Gregg, of Ottawa. The various efforts to increase the membership of the organization were outlined, with how stands at 1,802, with twenty-seven affiliations, were outlined.

Vessels Are Leaving For Hudson Bay

Ship Movements From Montreal To Bay Have Been Numerous This Season

Montreal.—Ship movements from Montreal to Hudson bay have been fairly numerous this season with the departure of dredges, hopper barges and other craft for service at Port Churchill, terminus of the Hudson Bay railway, where a modern ocean liner, being developed by the Canadian Vickers shipbuilding plant, constructed another 8-yard dipper dredge, Churchill No. 1, which was constructed by that firm, a self-propelling hopper barge, Chesterfield, which was built by the Collingwood Shipbuilding Company and the powerful tug, Daisy, purchased by the Canadian Government from the Irish Free State.

Banff Motor Highway

Ten Miles Of Bituminous Surfaced Road To Be Built As Experiment

Banff, Alberta.—The entire motor highway from the eastern to the western gates of the Banff National Park may be built as a bituminous surface if experiments now under way under the supervision of J. A. Harkin, commissioner of parks for the Dominion Government, are successful. This information was given out by Mr. Harkin himself.

Mr. Harkin said the present experiment will include the building of bituminous surfaced roads for five miles east and five miles west of Banff, making ten miles in all.

The Niagara Falls As Seen

Niagara Falls, Ont.—An interesting addition to the attractions of Niagara Falls was suggested by Mayor H. P. Stephens who claimed that it was possible to project motion pictures on the American Falls, at a meeting of the committee in charge of the illumination. A special committee will investigate the proposal.

Will Be Proclaimed King

Belgrade, Jugoslavia.—Transition of Albania from a republic into monarchy is being rapidly consummated, according to advices received here, from Tirana and from frontier points. These reports state that Ahmed Zogu, president of the republic, is to be proclaimed king within a few days.

Police Active At Coast

Vancouver.—Determined to put an end to the epidemic of sea cracking in Vancouver, British Columbia, the Vancouver Police Department announced that a power squad of special automobiles and armed with sword-oiled engines will patrol the city each night.

Alberta Experimental Tests

May Establish Permanent Experimental Farm In Peace River District

Edmonton.—Experimental tests of an extensive nature are being carried on in Alberta, in common with other parts of the west, stated Dr. J. H. Galsdale, of Ottawa, deputy minister of agriculture. In this province, the work concerning grains and grasses is being undertaken on a large scale while growing of certain range foods and tobacco is also receiving special attention.

Dr. Galsdale left for a visit to the Peace River country. While in that area, he will likely select a location for a permanent experimental station as the one now operated at Beaver Lodge is held under a lease. After looking over property in the Grande Prairie, Wembley, and Beaver Lodge districts, he will submit a recommendation as to what section should be acquired by the federal government for the development of its permanent station in the north.

GOVERNOR SMITH STATES POLICY IN VIGOROUS SPEECH

Albany, N.Y.—With all the force at his command, Alfred B. Smith, governor of the state of New York, told an expectant nation what he would do if elected president. In aggressive fashion, he accepted the Democratic nomination with a speech which will set forth his stand on prohibition, agriculture, foreign relations and other public questions, but attacked the Republican administration as a failure to keep faith with the people.

As millions listened-in by radio, the new leader of the Democrats advocated modification of both the Volstead law and eighteenth amendment, reiterated that he would give the people of controlling crop purposes his immediate attention if elected, assailed the administration's Nicaraguan and Mexican policy, and pledged himself to a "real" endeavor to outlaw war.

He also called for a reorganization of Federal Government activities in a business sense, declared that neither he nor the Democratic party contemplated "sudden or drastic" changes in foreign relations, reaffirmed his stand for public ownership and control of waterways, promised a square deal for workmen, stressed the need for inland waterway development, reforestation and conservation of natural resources, and advocated a tariff schedule, reformed for the protection and care of working men and women.

His Democratic platform declaration for restrictive immigration, the nominee asserted that he was "heartily in favor of removing from the immigration law the harsh provision which separates families," and was "opposed to the principle of restriction based upon the figures of immigrant population contained in a census 35 years old."

Support For Stresemann

Berlin, Germany.—Foreign Minister Stresemann, visiting with the German cabinet for the first time since his recent illness, made an extensive report on the foreign situation with emphasis on the forthcoming renunciation of war treaty cessions at Paris and the League of Nations meeting at Geneva. He found the cabinet members in accord with him.

Labour Premier's Canadian Tour

Ex-Premier Lt. Hon. Ramsay MacDonald and his three daughters will be accompanied by the secretary of Northern Ontario along the

FIGHT ILLEGAL LIQUOR EXPORT

Gordon N. Shaver, K.C., has been appointed by the attorney-general of Ontario to act as special crown prosecutor in the proceedings against liquor export companies at Windsor as a result of seizure of about \$50,000 liquor along the Canada-United States border by the Ontario liquor control board in its fight against illegal export.

Gordon N. Shaver, K.C., has been appointed by the attorney-general of Ontario to act as special crown prosecutor in the proceedings against liquor export companies at Windsor as a result of seizure of about \$50,000 liquor along the Canada-United States border by the Ontario liquor control board in its fight against illegal export.

Prosperous Saskatoon

City's Financial Position Never Better Than At Present Time

Saskatoon, Sask.—Saskatoon's financial position was never better than at the present time. Due to better tax collections, the city has entirely wiped out its current loans from the bank and has on deposit today approximately \$80,000.

This is the first time in the history of the city that this condition has existed, and it is said to be due entirely to the improved business conditions experienced here.

Earlier in the year there was one occasion when the city was able to wipe out its current bank loans, but there was no surplus.

Eye Tests For Motorists

Suggest Tests For Visual Efficiency For Drivers In Saskatchewan

Saskatoon, Sask.—Something of practical value and of more passing interest to Saskatchewan motorists is being negotiated by the Saskatchewan Optometric Association, assistant secretary.

Harry S. Hay, Saskatoon, has submitted to the meeting a proposal whereby a test of visual efficiency for drivers would be possible.

"The association appointed a committee to conduct a thorough investigation of the visual tests which drivers are subject. This committee will make its report at the next meeting."

Support For Stresemann

Berlin, Germany.—Foreign Minister Stresemann, visiting with the German cabinet for the first time since his recent illness, made an extensive report on the foreign situation with emphasis on the forthcoming renunciation of war treaty cessions at Paris and the League of Nations meeting at Geneva. He found the cabinet members in accord with him.

Advice To Dairymen

Hon. C. M. Hamilton Says Industry Here Is Not Behind Other Countries

Ottawa, Ont.—Bringing back some friendly advice for Canadian dairymen, Hon. C. M. Hamilton, minister of agriculture in Saskatchewan, reached Ottawa. He is returning from the world's dairy conference in London, where 1,800 delegates represented nearly every country in the world "Canadian dairymen." Mr. Hamilton observed, "does not appear to be behind other countries in the line of production and manufacturing. It is in a number of the provinces, dairymen are largely a side line."

"To establish ourselves in the British market, as producers of butter or cheese, bacon or any other agricultural product, we must not only place on the market the highest quality but also a sturdy volume. Merchants whose customers have developed a taste for a certain thing will be able to supply it continuously and that is where we sometimes fall down."

Mr. Hamilton tells of the Hon. W. R. Mulock's travels. He has moved all over the British Isles and is going to France, Belgium, Germany and "nearly all the Scandinavian countries to see if they have anything on us in the line of agriculture."

Joins Scottish Club

Lord Lovat Becomes Honorary Member Of Club In Toronto

Toronto.—A distinguished Scot was added to the honorary membership of the Scottish Club of Canada, when the club honored Lord Lovat, parliamentary under secretary for Dominion Affairs, who is in Toronto for the purpose of conferring with the Ontario government on immigration matters. In accepting the honor, Lord Lovat reminded the membership that they could do much good by extending a friendly hand to boys who come out from the British Isles.

Less Drunkenness In England

Convictions Show The Lowest Total For Nine Years

London, Eng.—According to the official statistics of convictions for drunkenness in England published today, the most sober city in the Kingdom has been London for nine years. Plymouth and the city with the most proportionate convictions is the pretentious, but almost cathedral town of Norwich, in Norfolk.

Convictions throughout the country totaled 65,000 during the year, a decrease of 1,000 from the lowest total in nine years.

MIGRATION PLAN IS ESSENTIALLY BRITISH PROBLEM

Toronto, Ont.—While the province of Ontario is willing to co-operate in every possible way in bringing the immigration scheme suggested by Lord Lovat to fruition, Premier Ferguson expressed the opinion that the matter was essentially a British rather than an Ontario problem.

Discussing the conference held with Lord Lovat in his office here, the premier stated that he looked forward with great optimism to the final result although he admitted that the paramount question of finance had not been definitely settled.

The premier pointed out that the Ontario government was already advancing money to Ontario farmers and financing settlers in Northern Ontario.

Under the scheme the British government is working directly with the Dominion Government and financial details are being worked out between these two governments.

Would the British Government be willing to finance the scheme if Ottawa decided not to enter into agreement with the premier was asked.

"That is what we were discussing yesterday," replied the premier.

"It will also be a subject of further conference when I meet Lord Lovat again. The British Government is willing to assist in financing the men and I gather from Lord Lovat that the discussions at Ottawa have been satisfactory."

The premier expressed the opinion that if the farmers of Ontario paid a yearly wage rather than seasonal, no difficulty would be encountered in keeping the men on the farms.

PRINCE GEORGE GREETED YOUNG AMBASSADORS

Vancouver.—His Royal Highness Prince George was greeted here before he boarded his ship, H.M.S. Duncan, by four members of the Empire ambassador party now touring Canada and by the organizer of the tour, Frank Lacout.

The prince expressed great interest in the tour of the young ambassadors and said that both he and the Prince of Wales were conversant with it, the latter having been identified with the scheme. His Royal Highness was particularly interested to learn it was planned to extend the tour to other parts of the Empire in the future.

The prince chatted with each member of the party. He was told that many of the delegation were planning to give lectures and write newspaper articles concerning the tour upon their return.

Prince George, in bidding the group farewell, expressed the belief that their visit would do a great deal of good for Canada and the Empire generally.

Receives Message From Missing Aviators

Amateur Radio Operator In Communication With Grater Rockford Crew

Toledo, Ohio.—A long message purporting to be from the crew of the Grater Rockford, was received by Joseph E. Williams, an amateur radio operator, who declared he was in direct communication with the crew for ten minutes.

The crew said, according to Williams, they were all well.

"We are stranded on a small island 100 miles north of Newfoundland. We are in a desperate situation. We need assistance badly. Please do all in your power to get help to us."

Williams then said he conversed with a member of the crew and in reply to a further question, said: "Just say we are safe and well."

Then, Williams stated, the message was garbled and all he was able to catch was, "because we haven't any more coal since yesterday."

The communication ended, Williams stated, "I have been trying hard to touch with some station at night. Please hurry."

Williams declared the message was received by a Vancouver station 124 miles at his station SAME. He was talking directly with the call letters of the Grater Rockford's radio station.

He stated that he first received faint signals at 11:30 and at 11:45 he could make out the words "radio station" although the interference was bad.

Refused To Fly With Lindbergh!

Little Girl Has Distinction Of Being First One To Pass Up Chance

Wahash, Ind.—Maxwell, 9-year-old daughter of Mrs. Eva Pettit turned down a personal invitation by Colonel Charles A. Lindbergh to take a flight in a plane with him as pilot.

Answering the Colonel's request the little girl said: "I never fly with anybody but my dad."

Lindbergh said, "Young lady, you have the distinction of being the first person to refuse to fly with me."

Canadian On Byrd Expedition

Montreal, Que.—Frank T. Davies who graduated in the sciences at McGill last spring, will accompany Commander Byrd's Antarctic expedition as chief physicist, on the recommendation of Dr. Ross Macdonald, as acknowledged his authority. Davies will work on ice observation at the great harbor, observation of the aurora borealis, research in magnetism and atmospheric electricity.

Hints At Separate Agreement

Toronto.—Premier Ferguson says that Britain must finance her own immigration, following his discussion with Lord Lovat. He said, however that in the event of the Federal Government not entering into similar arrangements with Lord Lovat, Ontario might make her own pact with the British Government.

Overcome With Fumes

Montreal.—Four stowaways who were aboard the Italian ship in port here shortly after the vessel had been inspected are at the Notre Dame hospital in a serious condition suffering from potassium poisoning.
